DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Schnurmann (Reg. No. 35791) on 07/06/06.

The application has been amended as follow:

Claim 1 line 7, after "depend on" insertion --, and identifying parameters in which delay functions are separable--.

Claim 1 line 9, after "assignment" insertion --, and setting independently each of said parameters in which delay functions are separable from a value that results in a worst slack value at said timing test--.

Claim 11 has been canceled.

Claim 12 line 1, change "claim 11" to --claim 1--.

Claim 26 line 6, after "depend on" insertion --, and mean for identifying parameters in which delay functions are separable--.

Claim 26 line 8, after "assignment" insertion --, and mean for setting independently each of said parameters in which delay functions are separable to a value that results in a worst slack value at said timing test--.

Claim 28 has been canceled.

Art Unit: 2825

Claim 29 line 1, change “claim 28” to “claim 26”.

Claim 30 line 8, after “ depend on” insertion --, and identifying parameters in which delay functions are separable--.

Claim 30 line 10, after “ assignment” insertion --, and setting independently each of said parameters in which delay functions are separable to a value that results in a worst slack value at said timing test--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowed because the prior art does not teach or suggest a method for performing a static timing analysis of a digital system in the presence of a plurality of global sources of delay variation comprising the steps of: identifying at least one global parameter on which distinct portions of said early and late paths' delays depend on, and identifying parameters in which delay functions are separable; and determining for at least one of said global parameters at least one consistent value assignment, and setting independently each of said parameters in which delay functions are separable from a value that results in a worst slack value at said timing test and with the combination of all other features corresponding to the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
